

AMENDMENTS

In the Specification

The language being added is underlined (“ ”) and the language being deleted contains strikethrough (“”):

Amend the paragraph starting at pg. 6, lines 21 as follows:

The light-emitting device 102 emits light on the object 101. The light can be, but is not limited to, infrared light such as near and far infrared light, laser light, white light, violet light, indigo light, blue light, green light, yellow light, orange light, red light, ultra violet light, ~~microwaves, ultrasound waves, radio waves,~~ X-rays, ~~cosmic rays,~~ or any other frequency that can be used to form the set of images 105 of the object 101. The frequency of the light should be such that the light can be incident on the object 101 without harming the user 106. Moreover, the frequency should be such that a light is reflected from the object 101 due to the light emitted on the object 101.
